DISCUSSION NOTES:

- **Images:** We decided to continue with the background image from mockup A. We discussed using opaque panels, large font, or positioning to avoid contrast issues. The number of images should be somewhere between the two mockups.
- **Information & Font:** We discussed paraphrasing information and using accessible language. The header font from mockup A will be used as the h1 font and the header font from mockup B will be used as the h2 font.
- **Navigation:** We agreed the collapsible navigation menu was really cool and should be explored. It could be implemented on both desktop and mobile.
- **Final Touches:** There was not time for hand-made illustrations but we agreed it would be a fitting final touch.
